## LEGEND

**X Target Date** for CalUsource spend data publication and Procurement Dashboard refresh

The **Target Date** for processing campus send files would occur when campus spend files are submitted on-time, no data anomalies observed, and no additional data validation is required during the initial review. If everything is in order and no further checks are necessary, the data availability is on the target date.

**X Latest Date** for CalUsource spend data publication and Procurement Dashboard refresh

The **Latest Date** for processing campus spend files would occur when the time is needed to address data anomalies and perform additional data validation and correction. This delay could be further extended if the campus spend file delivery is impacted by the campus accounting month-end close or data shifting.

### Reminder:

Campuses are required to submit the previous month's spend data by the 8th business day after the month-end closure. The submitted campus spend data will undergo classification, normalization, and validation before being published in CalUsource and refreshing the Procurement Dashboard in the following month.

For detailed information on spend processing, please consult the [Spend Data Process Flow](#).
